

#### **Government of India** Ministry of Environment, Forest and Climate Change (Issued by the State Environment Impact Assessment **Authority(SEIAA), JHARKHAND)**

To,

The Additional General Manager NTPC LIMITED SITE OFFICE SIKRI, BARKAGAON, HAZARIBAGH JHARKHAND -825311 -825311

Subject: Grant of Environmental Clearance (EC) to the proposed Project Activity under the provision of EIA Notification 2006-regarding

Sir/Madam.

This is in reference to your application for Environmental Clearance (EC) in respect of project submitted to the SEIAA vide proposal number SIA/JH/CMIN/426263/2023 dated 11 Sep 2023. The particulars of the environmental clearance granted to the project are as below.

1. EC23B001JH128665 EC Identification No. SEIAA/2023-24/2916/2023 2. File No.

3. **Project Type** New 4. Category В

Project/Activity including 5. 1(a) Mining of minerals Schedule No.

6. Name of Project North West Quarry of Pakri Barwadih opencast Coal Mine Project

7. Name of Company/Organization NTPC LIMITED 8. **Location of Project JHARKHAND** 

9. **TOR Date** N/A

The project details along with terms and conditions are appended herewith from page no 2 onwards.

(e-signed) Ashok Kumar, IFS Date: 11/10/2023 **Member Secretary** SEIAA - (JHARKHAND)

Note: A valid environmental clearance shall be one that has EC identification number & E-Sign generated from PARIVESH.Please quote identification number in all future correspondence.

This is a computer generated cover page.

Nursery Complex, Near Dhurwa Bus Stand, P.O+P.S-Dhurwa, Ranchi, Jharkhand-834004 E-mail: msseiaa.jhk@gmail.com/chr-seiaajhr@gov.in website: www.jseiaa.org

Letter No: EC/SEIAA/2023-24/2916/2023/

Ranchi, Date:

To: Head of Project,

Pakri Barwadih North West Coal Mining Project,

Sikri Site Office, Barkagaon,

Hazaribagh – 825311, (Jharkhand).

Environmental Clearance for the project "North-West Quarry of Pakri Barwadih Opencast Coal Mine of M/s NTPC Limited at Village: Bariatu, Basaria, Beltu, Jabra, Kandaber, Nawadih, Sirma & Urub, Tehsil: Keredari and Barkagaon, Hazaribagh, Jharkhand (485.159 Ha)", (Proposal No. : SIA/JH/CMIN/426263/2023) - regarding.

Ref: Your application no.- NTPC/PB-NW/2023/166, dated - 11.09.2023.

Sir.

It is in reference to the project "North-West Quarry of Pakri Barwadih Opencast Coal Mine of M/s NTPC Limited at Village: Bariatu, Basaria, Beltu, Jabra, Kandaber, Nawadih, Sirma & Urub, Tehsil: Keredari and Barkagaon, Distt.: Hazaribagh, Jharkhand (485.159 Ha)" submitted by you for seeking prior Environmental Clearances (EC).

This is a new (Greenfield) project which has been taken for appraisal on 20.09.2023.

North-West (NW) Quarry of Pakri Barwadih Opencast Coal Mine Project of NTPC Ltd. is a Greenfield project with a targeted coal production of 3.0 MTPA within the lease area of 485.159 Ha in Bariatu, Basaria, Beltu, Jabra, Kandaber, Nawadih, Sirma and Urub Villages of Keredari and Barkagaon Tehsil in Hazaribagh District of Jharkhand State.

Considering that this is a coal mining project with a lease area of 485.159 Ha, as per MoEF&CC notification S.O.1866(E) dated 20.04.2022, it is classified under Category B which necessitates environmental clearance from SEIAA, Jharkhand.

This quarry is a part of the Pakri Barwadih Coal Mine Block of NTPC Ltd. which comprises three distinct quarries namely. Pakri Barwadih West (PB-West), Pakri Barwadih East (PB-East) and the subject project. The entire Pakri Barwadih Coal Block is designed to produce 18 MTPA of coal (15 MTPA from PB-West & PB-East + 3 MTPA from PB North west) for captive use at the power plants of NTPC Ltd. located at different parts of country. Mining

operations at PB-West and PB-East Quarry have already commenced subsequent to obtaining the necessary statutory clearances.

North West Quarry of Pakri Barwadih Coal Mine Project is bound by latitudes 23° 54'13.04" to 23° 55'43.25" North and Longitudes 85° 09' 09.79" to 85° 11' 02.40" East. Out of the total lease area of 485.159Ha, private tenancy is 113.557Ha, Government Land is 19.713 Ha and balance 351.89Ha is forest land. 20.692Ha of forest land was already transferred to NTPC vide MoEF&CC letter dated 17.09.2010. For the balance 331.198Ha, Stage-I forest clearance was obtained on 26.05.2023 vide MoEF&CC letter 8-56/2009-FC-(vol). In absence of Khatiyan copy at CO office, DC, Hazaribag has issued land certification for private tenancy and Government land vide letter no. 3070 dt 05.09.2023 in Form-I (as per Jharkhand Govt. circular 4792 dt 04.12.2018)

Topographically the area is rather hilly, rugged and undulating and the elevation varies from 430m to 460m above MSL. The two sides are defined by Khora Nala west and Khora nala east on the western and eastern side respectively, which discharges its load in Lathorwa Nala which in-turn joins Haharo Nadi. Besides these there are many small streams & streamlets, which discharge their load into this nala. All the nalas of the block are seasonal and become dry during summers.

Khora Nala West enters the mining lease from North Western boundary and flows towards West Central boundary of the mining lease. It traverses path of 1.65 Kms inside the mining lease boundary. The other seasonal nala locally termed as Khora nala east is passing on the eastern side of lease. As per the approved mining plan, for Khora Nala West it is proposed for a realignment around the mine boundary in the NW corner which is to be carried out in the initial phase of mining. As far as Khora nala east is concerned, it is passing in between the PB-W and PB NW block and about 33.18 Mil.T of coal is available as barrier and batter coal between both. No diversion of Khora nala east will be carried out in the initial phase of mining, though it is proposed to mine 33.18 Mil.T of coal in the batter and barrier from year 41 to 52. A detailed study in this regard will be conducted later at an appropriate time and ensured undisturbed water flow for the downstream users.

Barkagaon R.F is located 6.5Km from the lease area. There are no sanctuaries within 10.0 km from the mine lease boundary. Hazaribagh wildlife sanctuary is located about 16.2 kms from the lease. As per the Eco-sensitive zone as per Final Notification S.O 2775(E) dated 01.08.2019 of MOEF & CC. The ESZ is located at a distance of 9.6 km form the lease area. As such NBWL clearance is not applicable.

The method of mining proposed to be adopted to extract coal and OB in PBNW Opencast mine will be proven mechanized opencast method of mining with conventional shovel – Dumper combination technology. There are total 10 nos. of coal seams, 5 each coal bearing horizons belonging to Barakar & Karharbari formation respectively. In ascending order these are seam K-1,K-2,K-3,K-4,K-5 in Karharbari Formation and Local(L), I, II, IV & V in Barakar Formation. Seam I splits into 3 sections viz. I Top, I Middle & I Bottom. At places Seam I Bottom and I Middle combined and form single seam namely I Bottom + Middle. Similarly, Seam II also splits into 3 sections viz. II Top, II Middle and II Bottom. Seam II Top and II

Middle coalesce to form single seam as II Top + II Middle in eastern part. Seam V & IV occur as a combined seam. In the approved Mining Plan, the entire property is envisaged to be mined by opencast method from the view of conservation of coal. The North West quarry is divided in to 2 pits namely Pit-1 & Pit -2.

Total geological coal reserve of PB NW Quarry as per GR is estimated to be about 137.584 Million Tonnes. It is estimated that 105.78 Million Tonnes of mineable coal would be available against overburden of 348.24 Mm3 within the mine boundaries. Additional reserves of barrier 33.18 Million Tonnes can be mined by removal of batter. The total extractable reserves including the reserves blocked in the common boundary of PB-W and PB-NW is 138.96 Million Tonnes. The average stripping ratio works out to 3.15 m3/T.

Out of 438.24 Mil.m3 of waste to be generated, 74.25 Mil.m3 will be stored in temporary external dump (Out of which 9.13 Mil.m3 will remain as embankment and the remaining will be rehandled in the later stage) and the remaining will be simultaneously back filled. As such there will be no external dump.

Power requirement for the mine is estimated as 8.5 MVA which shall be sourced from JUSNL (Jharkhand Urja Sanchar Nigam Ltd.) Patratu at 220 KV, at Main receiving Substation of 220/33/11 KV at Pakri Barwadih. Study is under process for installation of solar panels at Overburden Dump of Pakri Barwadih West mine having a potential of generating around 13 MW solar power. Feasibility shall also be explored for installation of rooftop solar panels on office building to reduce the power requirement. Total project cost is 91232 Lakh.

The Peak water requirement for PB North west quarry is estimated as 745.5 m3/day. Potable water requirement will be met from borewell. Industrial, water sprinkling and greenbelt and plantation water requirements will be met from mine sump water and treated ETP/STP water. Additional mine sump water will be discharged to Khora Nala for gainful use.

Purpose	Total Water Requirement (KLD)	Quantity Reused (KLD)	Balance water Requirement (KLD)	Remarks

#### **IMPACT AND MITIGATION MEASURES:**

- ❖ Air: The principal sources of air pollution due to mining and allied activities are drilling. blasting, movement of HEMM, wind erosion of dumps, CHP operation etc. It is proposed to adopt various control measures such wet drilling, controlled blasting, fixed water sprinkling of 2km length, mobile water sprinkler, covering transport vehicles with tarpaulin, avenue plantation, etc.
- **Water:** Effluents generated from the workshop building will be treated in ETP with oil and grease trap of 60 KLD capacity. The treated water will be reused within the workshop. Domestic effluent will be treated in Sewage treatment plant with 60KLD capacity is proposed to be installed for treatment of domestic waste water. The treated water will be used for greenbelt and plantation. Rainwater runoff from waste dump and coal stock will be collected through surface runoff management structures such as 6550m of garland drain, 4700m of retaining wall, check dam etc. Dumps will be stabilized by means of plantation of native species with geo textile matting.
  - a) Surface Water: To analyse change in hydraulic pattern of Khora nala east under existing as well as diverted conditions, a detailed study was carried out through "Think Innovative Solutions, Ranchi". The conducted study suggests that diversion of both nalas seems technically feasible as the desired cross section and flow can be maintained even after diversion. Besides, to ensure the surface water quality various measures are planned such as construction of retaining wall. peripheral garland drain, settling ponds, embankment between the mine pit and the nala on either side, check dam / check weirs at vulnerable places, etc., letting

- out supernatant clearwater from mine sump conforming discharge limits into Khora Nala for gainful use by downstream users.
- b) Ground Water: Think Innovative Solutions, Ranchi carried out a detailed Hydrological study. Water level monitoring was carried out in 19 locations and it is seen that the water level in the pre monsoon is ranging from 1.5 – 10.4m BGL and the post monsoon water level ranges from 2.35 – 9.8m BGL. Two VES have been conducted within the mining lease area. There are 5 (five) different layers i.e., top soil, clay/weathered and fractured formation. Pumping test was conducted on the bore well-constructed in the mine periphery with the aguifer thickness of 7 meters. The hydraulic conductivity (k) calculated is 0.984 meter /day and transmissivity is 6.89 m<sup>2</sup>/day. Due to the low permeability of the aguifer units, the impact of pumping on local water regime will be minimal and the radius of influence will be limited.
- c) Rainwater Harvesting: In the 5 years, maximum of 17,32,701.30cum of total rainfall runoff will be generated in year 5. Rainwater harvesting by means of artificial recharge and rainwater storage structures is proposed in order to effectively utilize the above mentioned quantum of rainfall.
- ❖ Noise: The main sources of noise are drilling, excavation, dumpers, dozers, etc. Various control measures such as acoustic enclosures, avenue plantation, providing PPEs to workers, plantation around CHPs, proper maintenance of equipments.
- \* <u>Vibrations</u>: Mining activity in the adjacent Pakribarwadih West quarry is in place for the last 5 years. The Rock Excavation Engineering Division of CSIR-CIMFR, Dhanbad carried out field investigations at the Pakribarwadih West quarry. During this period, ten trial blasts were conducted at various locations of the mine. For controlled blasting operations using SME explosive within the blasting zone of 100 -150 m, blasthole diameter of 100-115 mm have been suggested to contain ground vibration within the safe level. However, for controlled blasting beyond 150 m from the residential houses, 160 mm blasthole diameter have been recommended.
- ❖ Biological Environment: Schedule-I species are Elephant. Indian Pangolin, Sloth Bear. Python, Indian Flapshell Turtle, White-Rumped Vulture, Indian Vulture, Indian Peafowl based on the letter obtained from DFO vide Lr.No.122 dated 27.03.2023. Site specific conservation plan has been approved by PCCF Wildlife & Chief Wildlife Warden, Jharkhand vide Office Order No.32 dated 03.08.2023. Rs 45.31 Crores has been allocated for a period of 10 years for implementation of various activities under Site Specific Wildlife Conservation Plan.
- \* Green Belt Development: Consultation with State forest department and State soil conservation department shall be made to select the species required for green belt / vegetation cover development. Species commonly found in Sal forest should be planted along the rows of sal saplings. Species serving the role of commercially valuable timber,

DA

NTFP and nurse trees/wildlife trees which attract wildlife, nitrogen fixation are considered to achieve the multiple uses. With regards to greenbelt and plantation, it is proposed to carry out plantation inside the lease area, avenue planation and also outside wherein a total of about 5.37.650 trees will be planted through the life of the mine with a total budget of Rs. 1075.30 Lakhs.

Dump stabilization: Proper levelling, grading, spreading of top soil in the inactive dump slopes, geotextiling, coir matting for dump slope stabilization. Plantation of hardwood species and other leguminous trees and shrubs, and hardwood species that can tolerate a wide range of acidity, fertility, moisture, and temperature will be established. The tree species that are best-suited to the soil properties and landscape conditions shall be planted on the site. Species of trees, shrubs, herbs, grasses with multiple use value like fuel, fodder, fruit, medicine will be used during the process of ecological restoration.

### **Socio Economy:**

Comprehensive need-based assessment was carried out by Asia Institute of Sustainable Development wherein the needs of the villagers were assessed. Based on the need requirement captured through FGDs, a CSR perspective Plan has been prepared for duration of 5 years. An amount of Rs.1.5 Crores has been allocated towards the implementation of the needs assessed.

# **Rehabilitation & Resettlement:**

Need Assessment study for villages around the quarry was conducted by the Asia Institute for Sustainable Development. Ranchi. 18 project affected area in this project of which 8 core villages falling within the lease area are directly affected by the PB NW Project namely Bariatu. Basaria. Beltu, Jabra, Kandaber, Nawadih, Sirma and Urub. 791 PAFs (Project Affected Families) in the 8 villages, who are losing land, or both land and home (204- Home oustees alone). Out of the 8 villages, Basaria, Nawadih and Sirma villages will be rehabilitated in PB North West Quarry. For the Pakri Barwadih North West Block, 485.159Ha of land from 8 project affected villages. (113.557Ha Tenancy Land) namely Basaria, Bariyartu, Beltu, Kandaber, Nawadih, Sirma, Jabra and Urub, has been notified by the Govt, and compensation disbursement is under progress. NTPC shall ensure all payments towards land compensation, R&R benefits and other benefits are being made as per State Government resolution.

The above measures will be implemented by the Environmental Management Group of the proponent. The total capital cost of environmental control measures works out to Rs.30.75 Crores and recurring cost works out Rs.1.43 Crores per annum (which is inclusive of public hearing action plan budget).

Public hearing for this project was conducted on 11.11.2022 under the chairmanship of representative of Dy. Commissioner, Hazaribag (District Land Acquisition Officer, Hazaribagh). About 1145 people participated in the public hearing and 23 people expressed their views during

the meeting. Public had expressed their concerns about compensation, employment, education, health facilities, pollution due to mining operations, training to locals, etc.

# **Risk & Hazard Mitigation:**

NTPC is committed to work towards 'Zero Harm' from their mining activities and carry out Health Risk Assessment (HRA) for identification of workplace hazards and assess their potential risks to health and determine appropriate control measures to protect the health and wellbeing of workers and nearby community.

Mining and allied activities will be carried out in conformation with the prevailing statutory provisions as per Mines Act 1952 and CMR 1957 applicable for safety in opencast mines, DGMS Circular 03 of 2019 on Risk Management plan, all statutory rules, regulations, applicable laws etc, rules imposed by local/State/Central authorities if any. Factors of risks involved due to human induced activities in connection with mining & allied Operations are Failure of Slope of mine benches and dumps, Operation of main mining & other equipments, Drilling. Storage & handling of explosives and Blasting. Other risk factors due to natural activities are Fire due to electricity and Oil, Flooding of mine/Mine Inundation and Natural calamities. Elaborate procedures and SOP's will be made and followed to mitigate the risks involved in the mining activity.

The description given above on predictions of anticipated impacts and various mitigative measures for each environmental parameter brings out the fact that systematic and scientific mining of coal with proper and timely execution of various environment management measures suggested in the report will ensure maintenance of future environmental quality within statutory limits. The impacts due to project will be suitably compensated by the liberal packages of rehabilitation and resettlement plan for the home and land oustees. By judicious implementation of the well laid Environmental Management System (EMS) as given in the report, it will be possible to achieve an environmentally sustainable industrial growth.

#### During the presentation the following documents were sought:

- i. Details regarding forest clearance, compensatory afforestation, NOC for ground water withdrawal, status of wildlife conservation plan. EMP cost.
- ii. Time bound action plan alongwith budget to address the issues raised during public hearing.
- iii. Budgets involved in the EC application of this project.
- iv. Details of utilization of excess water from the mine pit.
- v. Management of safety zone, surface water quality, energy conservation.
- vi. Undertaking regarding the diversion of Khora Nallah.

M

# The Project Authorities have submitted the above mentioned documents.

State Level Environment Level Impact Assessment Authority (SEIAA). Jharkhand in its 109<sup>th</sup> meeting held on 27<sup>th</sup> & 28<sup>th</sup> September, 2023 discussed the project proposal along with recommendations made by SEAC in its 108<sup>th</sup> meeting held on 19<sup>th</sup>, 20<sup>th</sup>, 21<sup>st</sup>, 22<sup>nd</sup>, 23<sup>rd</sup>, 24<sup>th</sup> and 25<sup>th</sup> September, 2023 and decided to grant EC to the project

On the basis of recommendation of SEAC and decision of SEIAA to grant of EC. Environmental Clearance is hereby issued to the "North-West Quarry of Pakri Barwadih Opencast Coal Mine of M/s NTPC Limited at Village: Bariatu, Basaria, Beltu, Jabra, Kandaber, Nawadih, Sirma & Urub, Tehsil: Keredari and Barkagaon, Distt.: Hazaribagh, Jharkhand (485.159 Ha)" alongwith the following specific conditions as recommended by SEAC:-

# I. Specific Conditions:

- i. This Environmental Clearance is valid subject to the following condition below That this project has
  - a. Obtained all legal rights to operate at concerned place.
  - b. Complied with all existing concerned laws of the land and
  - c. Complied with the decisions of SEIAA on the issue of Environmental Clearance till date.
- ii. The Project Authorities shall take all necessary measures to ensure that the quality of the Khora Nallah water is not affected due to the mining activities.
- Project Proponent will ensure that a safety barrier of 45 m on both side of the road passing within ML area will be maintained and no mining activity will be carried out in the safety barrier. After getting the permission for diversion of road from the competent authority, the copy of the permission for diversion shall be submitted to SEIAA/SEAC. Jharkhand alongwith the 06 monthly compliance report.
- iv. Mining activities in the safety barrier can be undertaken after diversion of the road is fully implemented and said land must be included in approved Mine Plan for the mining purposes.
- v. The Project Authorities must ensure Offset of conventional energy requirement of not less than 2% by installation of solar panel. Overall conservation of not less than 20% is to be ensured by use of efficient energy measures.
- vi. No mining/activity shall be undertaken in the forest land or deemed forest without obtaining requisite prior forestry clearance.
- vii. This Environmental Clearance is granted subject to final outcome of Hon'ble Supreme Court of India. Hon'ble High Court. Hon'ble NGT. MoEF & CC and any other Court of Law, if any, as may be applicable to this project.

4

<u>h</u>

- Environmental clearance is subject to obtaining prior clearance from forestry and viii. Wildlife angle including clearance from standing committee of NBWL, as may be applicable to this project (in case any fauna occurs / is found in the Project area or if the area involves forest land or Wildlife habitat i.e. core zone of elephant/tiger reserve etc. and or located with in 10 km. of protected area).
  - The project proponent may apply simultaneously for forest and NBWL clearance, in ix. order to complete the formalities without undue delay, which till process on their respective merits, no rights will vest in or accrue to them unless all clearance are obtained.

#### II. **Statutory compliance:**

- The project proponent shall obtain forest clearance under the provisions of Forest i. (Conservation) Act, 1980, in case of the diversion of forest land for non-forest purpose involved in the project.
- The project proponent shall obtain clearance from the National Board for ii. Wildlife, if applicable.
- iii. The project proponent shall prepare a Site-Specific Conservation Plan & Wildlife Management Plan and approved by the Chief Wildlife Warden. The recommendations of the approved Site-Specific Conservation Plan / Wildlife Management Plan shall be implemented in consultation with the State Forest Department. The implementation report shall be furnished along with the sixmonthly compliance report. (incase of the presence of schedule-I species in the study area).
- In the writ petition (Civil) no. 202/1995, T.N. Godaverman Thirumulpad vs union of iv. India and ors. the Hon'ble Supreme Court passed an order dated 03.06.2022 " National Park or Wildlife Sanctuary must have an ESZ of minimum 01 km in which the activities prescribed and prescribed in the guidelines of 09th February, 2011 shall be strictly adhered to".
- The project proponent shall obtain Consent to Establish / Operate under the V. provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/Committee.
- The project proponent shall obtain the necessary permission from the Central vi. Ground Water Authority, in case of drawl of ground water / from the competent authority concerned in case of drawl of surface water required for the project.
- vii. Solid waste/hazardous waste generated in the mines needs to addressed in accordance to the Solid Waste Management Rules, 2016 / Hazardous & Other Waste Management Rules, 2016 as amended from time to time.
- It shall be mandatory for the project management to submit six (06) monthly viii. compliance report in respect of the stipulated prior environmental clearance terms and conditions in hard copies and soft copies to the regulatory authority concerned

- Regional Office of MoEF & CC at Ranchi and Jharkhand State Pollution Control Board (J.S.P.C.B.), Ranchi/SEIAA/CPCB.
- ix. Concealing factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act. 1986.
- x. The SEIAA. Jharkhand or any other competent Authority may alter modify the above conditions or stipulate any further condition in the interest of Environment Protection.

### III. Air quality monitoring and preservation:

- i. Continuous ambient air quality monitoring stations as prescribed in the statue be established in the core zone as well as in the buffer zone for monitoring of pollutants, namely PM10. PM2.5. S02 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive targets in consultation with the State Pollution Control Board. Online ambient air quality monitoring stations may also be installed in addition to the regular monitoring stations as per the requirement and/or in consultation with the SPCB. Monitoring of heavy metals such as Hg. As. Ni. Cd. Cr. etc to be carried out at least once in six months.
- ii. The Ambient Air Quality monitoring in the core zone shall be carried out to ensure the Coal Industry Standards notified vide GSR 742 (E) dated 25.9.2000 and as amended from time to time by the Central Pollution Control Board. Data on ambient air quality and heavy metals such as Hg. As, Ni. Cd. Cr and other monitoring data shall be regularly reported to the Ministry/Regional Office and to the CPCB/SPCB.
- iii. Transportation of coal, to the extent permitted by road, shall be carried out by covered trucks/conveyors. Effective control measures such as regular water / mist sprinkling / rain gun etc shall be carried out in critical areas prone to air pollution (with higher values of PM1O/PM2.5) such as haul road, loading/unloading and transfer points. Fugitive dust emissions from all sources shall be controlled regularly. It shall be ensured that the Ambient Air Quality parameters conform to the norms prescribed by the Central/State Pollution Control Board.
- iv. The transportation of coal shall be carried out as per the provisions and route envisaged in the approved Mining Plan or environment monitoring plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed so that the impact of sound, dust and accidents could be appropriately mitigated.
- v. Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining 'PUC' certificate from the authorized pollution testing centres.

H

4

1

- Coal stock pile/crusher/feeder and breaker material transfer points shall invariably be vi. provided with dust suppression system. Belt-conveyors shall be fully covered to avoid air borne dust. Side cladding all along the conveyor gantry should be made to avoid air borne dust. Drills shall be wet operated or fitted with dust extractors.
- vii. Coal handling plant shall be operated with effective control measures w.r.t. various parameters. Environmental friendly sustainable technology environmental should be implemented for mitigating such parameters.

#### IV. Water quality monitoring and preservation:

- The effluent discharge (mine waste water, workshop effluent) shall be monitored in terms of the parameters notified under the Water Act, 1974 Coal Industry Standards vide GSR 742 (E) dated 25.9.2000 and as amended from time to time by the Central Pollution Control Board.
- ii. The monitoring data shall be uploaded on the company's website and displayed at the project site at a suitable location. The circular No. J-20012/1/2006-1A.II (M) dated 27.05.2009 issued by Ministry of Environment, Forest and Climate Change shall also be referred in this regard for its compliance.
- Regular monitoring of ground water level and quality shall be carried out in and iii. around the mine lease area by establishing a network of existing wells and constructing new piezometers during the mining operations. The monitoring of ground water levels shall be carried out four times a year i.e. pre-monsoon, monsoon. post-monsoon and winter. The ground water quality shall be monitored once a year, and the data thus collected shall be sent regularly to MOEFCC/RO.
- iv. Monitoring of water quality upstream and downstream of water bodies shall be carried out once in six months and record of monitoring data shall be maintained and submitted to the Ministry of Environment, Forest and Climate Change / Regional Office.
- Ground water, excluding mine water, shall not be used for mining operations. V. Rainwater harvesting shall be implemented for conservation and augmentation of ground water resources.
- Catch and or garland drains and siltation ponds in adequate numbers and vi. appropriate size shall be constructed around the mine working, coal heaps & OB dumps to prevent run off of water and flow of sediments directly into the river and water bodies. Further, dump material shall be properly consolidated/ compacted and accumulation of water over dumps shall be avoided by providing adequate channels for flow of silt into the drains. The drains/ ponds so constructed shall be regularly de-silted particularly before onset of monsoon and maintained properly. Sump capacity should provide adequate retention period to allow proper settling of silt material. The water so collected in the sump shall be utilised for dust suppression and green belt development and other industrial use. Dimension of the retaining wall constructed, if any, at the toe of the OB dumps within the mine to check

- run-off and siltation should be based on the rainfall data. The plantation of native species to be made between toe of the dump and adjacent field/habitation/water bodies.
- Adequate groundwater recharge measures shall be taken up for augmentation of vii. ground water. The project authorities shall meet water requirement of nearby village(s) after due treatment conforming to the specific requirement (standards).
- Industrial waste water generated from CHP, workshop and other waste water, shall viii. be properly collected and treated so as to conform to the standards prescribed under the standards prescribed under Water Act 1974 and Environment (Protection) Act. 1986 and the Rules made there under, and as amended from time to time. Adequate ETP / STP needs to be provided.
- The water pumped out from the mine, after siltation, shall be utilized for industrial ix. purpose viz. watering the mine area, roads, green belt development etc. The drains shall be regularly desilted particularly after monsoon and maintained properly.
- The surface drainage plan including surface water conservation plan for the area of influence affected by the said mining operations, considering the presence of river/rivulet/pond/lake etc. shall be prepared and implemented by the project proponent. The surface drainage plan and/or any diversion of natural water courses shall be as per the approved Mining PlaniEIA/EMP report and with due approval of the concerned State/Gol Authority. The construction of embankment to prevent any danger against inrush of surface water into the mine should be as per the approved Mining Plan and as per the permission of DGMS or any other authority as prescribed by the law.
- The project proponent shall take all precautionary measures to ensure xi. reverian/ riparian ecosystem in and around the coal mine upto a distance of 5 km. A revarian /riparian ecosystem conservation and management plan should be prepared and implemented in consultation with the irrigation / water resource department in the state government.

#### V. Noise and Vibration monitoring and prevention

- Adequate measures shall be taken for control of noise levels as per Noise Pollution i. Rules, 2016 in the work environment. Workers engaged in blasting and drilling operations, operation of HEMM, etc shall be provided with personal protective equipments (PPE) like ear plugs / muffs in conformity—with the prescribed norms and guidelines in this regard. Adequate awareness programme for users to be conducted. Progress in usage of such accessories to be monitored.
- Controlled blasting techniques shall be practiced in order to mitigate ground ii. vibrations. fly rocks, noise and air blast etc., as per the guidelines prescribed by the DGMS.
- The noise level survey shall be carried out as per the prescribed guidelines to iii. assess noise exposure of the workmen at vulnerable points in the mine premises. and report in this regard shall be submitted to the Ministry/RO on six-monthly basis.

#### VI. Mining Plan:

- Mining shall be carried out under strict adherence to provisions of the Mines Act 1952 and subordinate legislations made there-under as applicable.
- ii. Mining shall be carried out as per the approved mining plan(including Mine Closure Plan) abiding by mining laws related to coal mining and the relevant circulars issued by Directorate General Mines Safety (DGMS).
- No mining shall be carried out in forest land without obtaining Forestry Clearance as iii. per Forest (Conservation) Act, 1980
- Efforts should be made to reduce energy and fuel consumption by conservation. iv. efficiency improvements and use of renewable energy.

#### VII. Land Reclamation:

- Digital Survey of entire lease hold area/core zone using Satellite Remote Sensing survey shall be carried out at least once in three years for monitoring land use pattern and report in 1:50,000 scale or as notified by Ministry of Environment, Forest and Climate Change (MOEF&CC) from time to time shall be submitted to MOEFCC/Regional Office (RO).
- The final mine void depth should preferably be as per the approved Mine Closure ii. Plan, and in case it exceeds 40 m, adequate engineering interventions shall be provided for sustenance of aquatic life therein. The remaining area shall be backfilled and covered with thick and alive top soil. Post-mining land be rendered usable for agricultural /forestry purposes and shall be diverted. Further action will be treated as specified in the guidelines for Preparation of Mine Closure Plan issued by the Ministry of Coal dated 27<sup>th</sup> August, 2009 and subsequent amendments.
- The entire excavated area, backfilling, external OB dumping (including top iii. soil) and afforestation plan shall be in conformity with the "during mining" / "post mining" land-use pattern, which is an integral part of the approved Mining Plan and the EIA/EMP submitted to this Ministry. Progressive compliance status vis-a-vis the post mining land use pattern shall be submitted to the MOEFCC/RO.
- Fly ash shall be used for external dump of overburden, backfilling or stowing of mine iv. as per provisions contained in clause (i) and (ii) of subparagraph (8) of fly ash notification issued vide SO 2804 (E) dated 3<sup>rd</sup> November, 2009 as amended from time to time. Efforts shall be made to utilize gypsum generated from Flue Gas Desulfurization (FGD), if any, along with fly ash for external dump of overburden, backfilling of mines. Compliance report shall be submitted to Regional Office of MoEF&CC, CPCB and SPCB.
- Further, it may be ensured that as per the time schedule specified in mine closure plan it should remain live till the point of utilization. The topsoil shall temporarily be stored at earmarked site(s) only and shall not be kept unutilized. The top soil shall be used for land reclamation and plantation purposes.

EC Identification No. - EC23B001JH128665 File No. - SEIAA/2023-24/2916/2023 Date of Issue EC - 11/10/2023

Active OB dumps shall be stabilised with native grass species to prevent erosion and surface run off. The other overburden dumps shall be vegetated with native flora species. The excavated area shall be backfilled and afforested in line with the approved Mine Closure Plan. Monitoring and management of rehabilitated areas shall continue until the vegetation becomes self-sustaining. Compliance status shall be submitted to the Ministry of Environment. Forest and Climate Change/Regional Office.

vi. The project proponent shall make necessary alternative arrangements, if grazing land is involved in core zone, in consultation with the State government to provide alternate areas for livestock grazing, if any. In this context, the project proponent shall implement the directions of Hon'ble Supreme Court with regard to acquiring grazing land.

#### VIII. Green Belt:

- i. The project proponent shall take all precautionary measures during rmnmg operation for conservation and protection of endangered/endemic flora/fauna, if any, spotted/reported in the study area. The Action plan in this regard, if any, shall be prepared and implemented in consultation with the State Forest and Wildlife Department.
- ii. Greenbelt consisting of 3-tier plantation of width not less than 7.5 m shall be developed all along the mine lease area as soon as possible. The green belt comprising a mix of native species (endemic species should be given priority) shall be developed all along the major approach! coal transportation roads..

# IX. Public hearing and Human health issues:

- i. Adequate illumination shall be ensured in all mine locations (as per DGMS standards) and monitored weekly. The report on the same shall be submitted to this ministry & it's RO on six-monthly basis.
- ii. The project proponent shall undertake occupational health survey for initial and periodical medical examination of the personnel engaged in the project and maintain records accordingly as per the provisions of the Mines Rules. 1955 and DGMS circulars. Besides regular periodic health check-up. 20% of the personnel identified from workforce engaged in active mining operations shall be subjected to health check-up for occupational diseases and hearing impairment, if any, as amended time to time.
- iii. Personnel (including outsoured employees) working in core zone shall wear protective respiratory devices and shall also be provided with adequate training and information on safety and health aspects.
- iv. Implementation of the action plan on the issues raised during the public hearing shall be ensured. The project proponent shall undertake all the tasks/measures as per the action plan submitted with budgetary provisions during the public hearing.

Land oustees shall be compensated as per the norms laid down in the R&R policy of the company/State Government/Central Government, as applicable.

v. The project proponent shall follow the mitigation measures provided in this Ministry'S OM No.Z-11013/5712014-IA.II (M) dated 29th October, 2014, titled 'Impact of mining activities on habitations-issues related to the mining projects wherein habitations and villages are the part of mine lease areas or habitations and villages are surrounded by the mine lease area.

#### Corporate Environment Responsibility: Χ.

- The project proponent shall comply with the provisions contained in this Ministry's OM vide F.No. 22-65/2017-IA.III dated 1<sup>st</sup> May 2018, as applicable, regarding Corporate Environment Responsibility.
- The company shall have a well laid down environmental policy duly approve by ii. the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental/forest / wildlife norms / conditions. The company shall have defined system of reporting infringements / deviation / violation of the environmental / forest / wildlife norms / conditions and / or shareholders / stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.
- A separate Environmental Cell both at the project and company head quarter iii. level, with qualified personnel shall be set up under the control of senior Executive, who will directly to the head of the organization.
- iv. Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry / Regional Office along with the Six Monthly Compliance Report.
- Self environmental audit shall be conducted annually. Every three years third V. party environmental audit shall be carried out.
- All the recommendations made in the Charter on Corporate Responsibility for vi. Environment Protection (CREP) for the plants shall be implemented.
- Occupational health surveillance of the workers shall be done on a regular basis vii. and records maintained as per the Factories Act.

#### XI. Miscellaneous:

The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently.

- ii. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies. Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
- iii. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
- iv. The project proponent shall monitor the criteria pollutants level namely: PM<sub>IO</sub>, S0<sub>2</sub>, NO<sub>x</sub> (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company.
- v. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment. Forest and Climate Change at environment clearance portal.
- vi. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
- vii. The project authorities shall inform to the Regional Office of the MOEFCC regarding commencement of mining operations.
- viii. The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
- ix. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
- x. The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee.
- xi. No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC).
- xii. Concealing factual data or submission of false / fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
- xiii. The Ministry may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
- xiv. The Ministry reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.

M

1

- xv. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
- xvi. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
- xvii. Any appeal against this Environmental Clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
- xviii. The Prescribed EC is valid as per Notification no. S.O. 1807(E) dated 12.04.2022 of MoEF & CC. Govt. of India.
